Date of birth: 1954-02-01

Brief Biography

Dr. Sung Hoon Noh is the Director of the Yonsei Cancer Center, Yonsei University Health System, Yonsei University College of Medicine in Seoul, Republic of Korea. He is an outstanding surgeon specialized in gastric cancer in the world. Since 1987, he has operated on about 10000 gastric cancer patients. With that, he built a reputation for himself as a doctor who has operated on the most number of gastric cancer patients in the world. His research interest has been focusing on standardization of gastric cancer surgery through educating and nurturing future generations. He also has studied translational research to realize the precision medicine through discovering biomarker, which can predict the prognosis and chemotherapy responsiveness, and developing para-clinical model system such as patient derived xenograft model. He led the CLASSIC trial, a landmark multinational randomized controlled trial, set the role of adjuvant chemotherapy after D2 gastrectomy for advanced gastric cancer. He was invited to over

Curriculum Vitae

10 countries in order to perform live surgery, and Surgeons from different countries studied under him.
